- they focus on solutions.”**

— OUR CLIENT :)

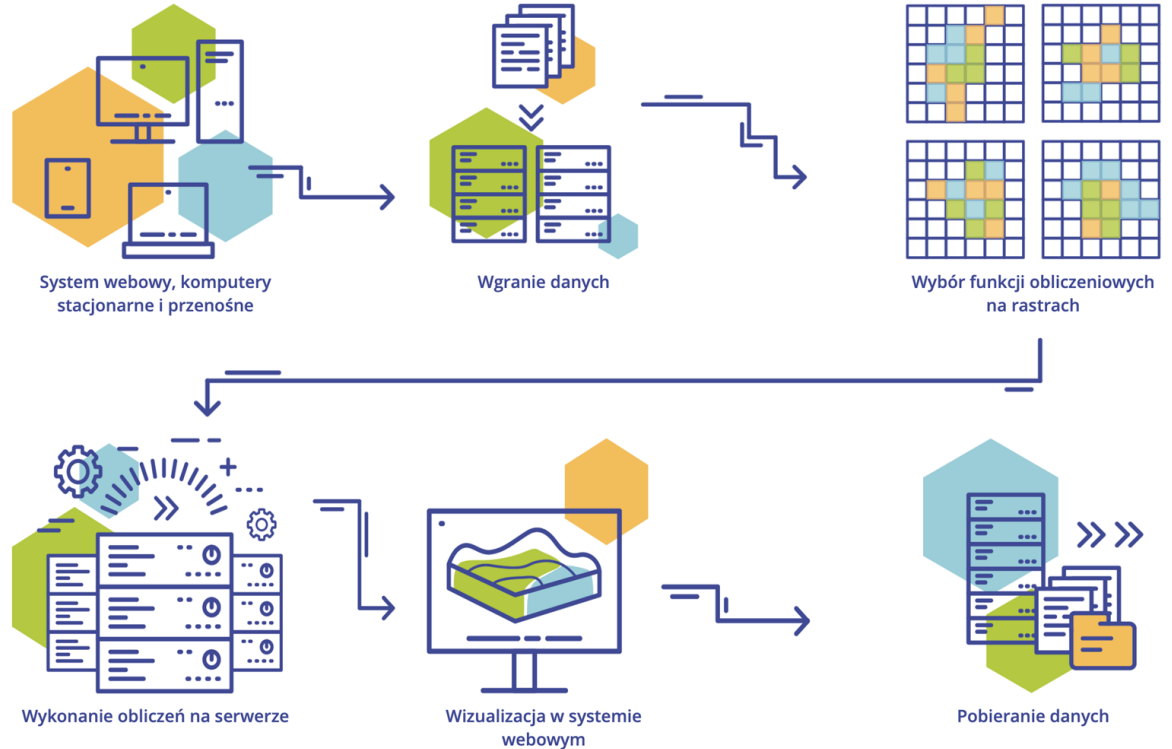

SPPS

We have developed the prototype of and implemented into production the system of the Psycho-audio-linguistic sensory simulator for Słuchu i Mowy Sp. Z o.o. The solutions designed in SPPS serve to introduce the hearing therapy on many different platforms instantaneously. The project has won an award in the Polish Product of the Future competition.

HPC GIS

Discover new opportunities to conduct detailed GIS analyzes on any scale in a surprisingly fast time on Hiper Performance Computers.

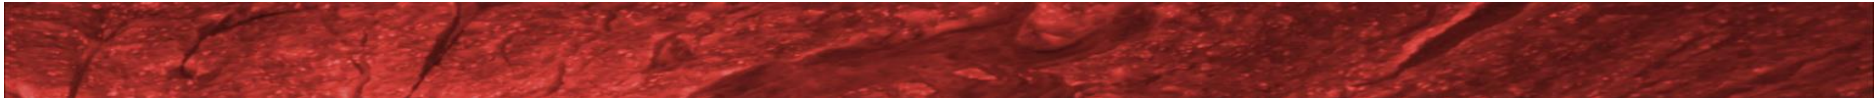

MOTIVATION

- Expanding competencies in the area of innovation process management
- Changes in the environment - social, technological, political
- We want to learn from the best: Toyota, Apple, etc.
